Profile

My experience spans from mobile to backend web development, working as a CCNA instructor, and recently dipping into the cybersecurity field completing an EC-Council CEH certificate and more than 20 penetration tests for commercial clients around Slovenia. I combine both technical knowledge and people skills, where security is a primary concern in everything I do, and client satisfaction is the goal I strive for.

Professional Experience

Web & Mobile Developer

Billender ✎

Cross-platform web and mobile application development with Flutter. Responsibility for all stages from development to deployment (Play Store, App Store, Netlify, and AWS). Experience integrating Swedish BankID.

10.2021 – present
Remote

Cybersecurity Expert

IPM Smart Community ✎

Conducting broad system security checks and penetration tests on networks and applications, conducting security audits, and analyzing security policies. Cybersecurity-related training.

03.2022 – present
Ljubljana, Slovenia

Head of IT

IPM Smart Community ✎

Management and organization of IT activities, preparation, and monitoring of the implementation of policies, rules, and instructions in the field of IT, care for the technological development of the company (IPM Smart Community) and the IPM Group.
